PERFORMANCE OUTCOMES SUMMARY

ANALYSIS OF REPORTS:

The report highlights the outcomes of the Summer Youth Employment Program implemented between June and September 2026. IRC and ACOE utilized a distinct program strategy from La Familia, focusing on youth on-the-job training and training opportunities leading to industry-recognized credentials.

It is also important to note that IRC's approach to program data entry and reporting differs from the structure of the current report, which captures participant outcomes upon program exit. As a result, many IRC participants remain actively enrolled and continue to receive services and support. Their outcomes will be reflected in the report upon program exit.

To date, **7 of the 11 participants (63.6%) have obtained the MC3/Trades certificate**. Compared with the program goal of 80%, this represents **79.5% of the established target.** Additional credential attainment and other participant outcomes may be documented as youth subsequently exit program services. Therefore, the current results reflect progress toward the program's credential attainment objectives, with final outcomes to be determined upon participant exit.

See Tables 1 (La Familia) and 2 (ACOE and IRC) for more information.
